

4.16.12.1 - 07/22/2022

Added

- Added FW_S5 template for FAST SAEBRS and Early Reading Spanish data loading.
- Add templates for ND ACCESS2 2021-2022 data loads.
- Added support for Dibels 8th Edition file loads and scales.
- Added Growth support for FAST K Adaptive Reading.

Changed

- Modified primary test calculation algorithm for STAR to align correctly with Renaissance-published SGP testing windows:
 - Fall: first test taken
 - Winter: test taken closest to January 15
 - Spring: last test taken
- Necessary changes to load MN Accountability tests in the preliminary period for 2022.
- Changes to the SEL WETL load to accommodate limitations in WETL4 (Anoka).
- Commit changes to format sproc for STARv2 after "deactivated" processing was moved to intLoad step.
- Changes to import for PreACT to load 2021-2022 data in new file format.
- Modified **Test Distribution** report for AP scores to spread data across multiple columns, not just all in one column.
- Modified **Test Scale Maintenance** report to allow a district to modify a Performance Scale Banding that is set as the score type's "Default" scale banding, but not as "Active"/"Displaying".
- Added load optimization for Student Grades and Student Absence data.
- Changed the sorting column datatype from a string representation of the load date to the datetime representation of the load date.
- Changed Enrollment Detail loading to alter overlapping dates within the same entry type.
- Changes to support new 360-col file format from ACT.

Fixed

- Fixed TS Gold Math Strand alignment.
- Fixed **Test Outline Count** report failing to render when more than 20 score types exist on a set of test outlines.
- Fixed **Performance Range Maintenance** report failing to render when the report is set to "(All Seasons)", and multiple test seasons share the same scale range sets.
- Fixed data import overflow issue with Student Absence by converting the Student Absence Detail table from an identity column table to a composite primary key data table based on absence record, absence type and period.
- Fixed issue with MAP V2 Edit procedure incorrectly flagging duplicate records.
- Restored functionality that was inadvertently removed in a prior release, to flag FAST Early Reading English records that only contain a CBMR score (not valid Early Reading records).
- Fixed **Placement Breakdown Comparison** Report Clickthrough report displaying duplicate student rows when a pie slice in the final outgoing season chart is selected.
- Fixed crashing within **Student Details** when an admin enabled **Student Details - Student Plans Reports** when no Student Plans or PLP site is configured at the Viewpoint site, as either empty or default configuration value.
- Fixed issue with STAR where Unified Scores higher than 1000 would not display with the National Norms - Unified scale.
