

Release Notes [4.16.26.0]

Added:

- Support for loading Behavior/Incident data from SWIS to Viewpoint
 - Please contact Viewpoint Support to get started.
- Student Details/Student Documents - Added "Newest Documents Only" checkbox, which displays the newest document of each type

- Student Documents Explorer - Added "Display" dropdown to give "Show Newest Only", which shows the newest document of each type

- Custom Rules System – Added support for all demographic types in Custom Rules system
- Placement Reports System – Added support for all demographic types in Placement reports
- Rules Reports System – Added support for all demographic types in Rules reports

At this time, request additional demographic type support with the Viewpoint Support Team.

Changed:

- State Accountability - Updated internal structure of views to accommodate changes to North Dakota state testing
- Viewpoint application – Updated the system with the new Viewpoint logo

Reminder of Confidentiality
Viewpoint compiles and reports confidential information about individual students that is sensitive in nature and protected by state and federal law, as well as by local district policy. This information is made available in order to serve our students, and is provided on condition of responsible use.
I certify that the information I access will be used solely toward instructional or administrative purposes.
I agree to manage all information gathered, whether by visual review or in digital or printed formats, responsibly and in a confidential manner.

Viewpoint is a registered trademark of Central Minnesota Education Research and Development Council

Viewpoint Version: 4.16.26.0

Removed:

- Student Details - Removed old and non-working ACT and STAR reference document links that caused garbled text
- References to old tests and processing from the helper table population

Fixed:

- Excel Exports of Placement Reports losing the first comment in a list of comments
- Excel Exports of Reports being off by one column when the report contained a rendered bar chart
- Report Tool Buttons not appearing in the Teacher Reports tab when a user did not have access to the Reports tab
- Batch Printing crashing on district student reports.
- Issue that caused Multi-Chart Reports that include an image-version of a grid-report to not render
- Excel Exports and PDF Printing of Student Documents Explorer not working
- Rules Option Maintenance error text for empty "Course Prerequisite", "Demographic" and "Enrollment Grade Level" rule lists previously referencing "Guideline Year" instead of "Rule Year"
